SUMMARY

I am a passionate and motivated third-year Computer Science and Engineering student at St. Joseph's College of Engineering (sixth semester) with a strong interest in software development, system design and cloud technologies, I am eager to apply problem-solving skills and technical knowledge to real-world projects while continuously growing as a software engineer.

WORK EXPERIENCE

The Hindu Group — Web Development intern

06/2025 - 07/2025

Designed and implemented a system to process and manage news articles using RabbitMQ for message queuing. Developed logic to segregate articles based on unique IDs, ensuring efficient filtering and categorization. Integrated MongoDB for persistent storage of selected articles, enabling reliable retrieval and management. Deployed RabbitMQ and MongoDB using Docker containers to ensure scalability, portability, and streamlined hosting.

PROJECTS

Deadline Tracker with Automated Notifications (DevOps-Oriented Backend System)

- Designed and developed a container-ready backend system using Java, Spring Boot, MySQL, and Docker, focusing on build automation, dependency management, and deployable architecture.
- Implemented time-based automation using scheduled jobs and integrated external services (SMTP and Telegram Bot API) for multi-channel notifications.
- Designed the application with DevOps principles, focusing on automation, service integration, and deployable architecture using Git-based version control.

Real-Time Log Processing System:

- Built a real-time log processing pipeline using Docker, RabbitMQ, and MongoDB to asynchronously filter and store application logs based on severity levels.
- Implemented severity-based log filtering (INFO, WARN, ERROR) to enable efficient monitoring and faster debugging of distributed applications.
- Optimized system performance and reliability by decoupling log producers and consumers, ensuring high availability and fault-tolerant log ingestion.

EDUCATION

2023 - 2027	St. Joseph's College of Engineering Bachelor of Engineering in Computer Science	(GPA: 8.68/10.0)
2022 - 2023	Maharishi Vidya Mandir Class 12 (PCMB+ English)	(91.2 %/10.0)

CERTIFICATIONS

- Networking Basics - CISCO
- Database Management Systems- NPTEL
- Python For Data Science - NPTEL
